Aspiring Cybersecurity Analyst with a software development background and hands-on experience building security tools, full-stack applications and offensive security labs. I have strengthened my skills through Hack The Box, TryHackMe, personal Active Directory labs and projects focused on automation, technical documentation and secure software development. Interested in joining a cybersecurity team where I can apply my software development and offensive security skills while continuing to grow professionally.

TECHNICAL SKILLS

Programming Languages: Python, Bash, JavaScript, TypeScript, HTML, CSS

Frameworks & Technologies: React, Vite, Express.js, PostgreSQL, Docker, Tailwind CSS

Cybersecurity: Web Application Security, Active Directory, Linux, Windows, HTTP, Authentication, Authorization, Role-Based Access Control (RBAC), JWT, Session Management

Tools: Burp Suite, Nmap, Wireshark, Metasploit, ffuf, Gobuster, Hydra, Impacket, NetExec, Git, GitHub

SELECTED PROJECTS

Secure Full-Stack Authentication Platform

- Developed a full-stack application using React, TypeScript, Express and PostgreSQL.
- Implemented secure authentication using JWT, rotating refresh tokens, httpOnly cookies and Role-Based Access Control (RBAC).
- Designed a reusable architecture with transactional operations and support for multiple backend implementations.

urlfckr

- Developed a multithreaded Python web crawler for reconnaissance capable of discovering subdomains and application paths.
- Implemented configurable crawl depth, rate limiting, custom HTTP headers and JSON export.

PRACTICAL EXPERIENCE

Cybersecurity Labs & Capture The Flag

- Completed security labs and challenges on Hack The Box and TryHackMe.
- Practiced web application security testing, Linux privilege escalation, Active Directory enumeration and post-exploitation.
- Developed custom tools to automate reconnaissance and penetration testing tasks.
- Maintain a technical portfolio, cybersecurity blog and public GitHub repositories.

EDUCATION

Brigham Young University–Idaho — Software Development

Relevant coursework: Programming with Functions, Programming with Classes, JavaScript Language, Web Fundamentals, Web Frontend Development I, Career Development

Certificate: Web & Computer Programming

Ensign College — Bachelor's in Information Technology

Relevant coursework: Python Scripting, Cloud Server Administration, PC Hardware Technician, Introduction to Information Technology

CERTIFICATIONS

- Cisco Networking Academy — Ethical Hacker (2026)
- Cisco Networking Academy — Introduction to Cybersecurity (2026)
- TryHackMe — Jr Penetration Tester Learning Path
- TestOut — PC Pro
- TestOut — Client Pro

LANGUAGES

Spanish: Native

English: Professional reading comprehension and technical documentation
